Key Initiatives of CCPI–STEM

CCPI–STEM initiative focuses on advancing STEM workforce education, and promoting the NSF Advanced Technological Education (ATE) program

- Establishment of community college Regional Networks for advancing STEM workforce education and encouraging academic and business partnerships

- Development of NSF ATE instructional modules for inclusion in community college leadership graduate programs and leadership institutes

- CCPI–STEM Fellows Program

- Dissemination: National, Regional, Local levels

  - e.g., CCPI-casts & Presidents' Press

Questions for Distinguished Panelists

- Please provide a brief summary of your and/or your college's experience with ATE grants. What benefits/recognition has your college experienced from receiving ATE award(s)?

- What is the focus of the grant at your institution? How was that decision made? Who was involved, and are there recurring roles within the submission, execution/implementation, and leadership in the grant?

- What advice/strategies would you share regarding the continuity of either an ATE grant proposal and/or project when administration changes and/or grant leadership and college priorities shift? Please share any specific examples you have encountered.

- What is/was the process to share the intent and outcomes of the grant to garner support with new leadership (chair, dean, vice president, and president)?

- In your opinion, how important is communication, advocacy, and support by the PI for the ATE proposal or project with or without a change in administration? Anything else just as important?

Upcoming CCPI-Casts: SAVE the DATES

- **ATE Mentoring and Other Resources**
Fri, October 18 @ 1:00 pm ET

- **How to Build Institutional Capacity for NSF ATE Grants**
Fri, November 15 @ 1:00 pm ET

- **Thought Leaders' Dialogue III on STEM Education with the League for Innovation in the Community College**
Fri, January 24, 2025 (90 minutes; time TBD)

- Visit ccpi-stem.org to RSVP and receive Zoom credentials
